

Chadd Padd Refueling Bibs

Offering users a convenient way to protect equipment surfaces and the environment, the patented Chadd Padd fuel bibs quickly absorb diesel, gasoline and oil spills at their source. As a multi-purpose spill response solution, these reusable mats catch and contain fuel before it becomes a problem, preventing fines and clean-up costs.

Ideal for industrial, construction and agriculture applications, the effective Chadd Padd mats are made out of the same material necessary for Spill Prevention, Control and Countermeasure (SPCC) requirements. Offered in two sizes, the 10" x 10" can hold up to 4.5 oz. of petroleum products and comes in rolls of 36 or 6-packs, while the 15" x 20" can absorb up to 11 oz. and is available in boxes of 18. Perforated, partial holes accommodate most filler ports for refueling or adding oil.

Anti-static treated, the Chadd Padd is made from clean, soft and absorbent polymers. It can be used multiple times for a variety of applications, such as a drip mat or when working with hydraulic fluid. It's even disposable, in accordance with applicable regulations.

The Chadd Padd costs just \$9.95 for a convenient 6-pack, while a roll of 36 10" x 10" pads, which fits neatly in a Chadd Padd dispenser, is \$34.95. Enter promo code EZFUEL8 at www.chaddpadd.com to save 10%. Wholesale rates, dispensers and other accessories are also available.
